SCHOOL BUS SCHEDULING AND ROUTING

The operation of school buses is scheduled to maximize safety and efficiency.

School bus routes, school sites, and safety of students at designated school bus stops are reviewed at least once each year and as changes occur. Routes are reviewed for safety hazards, fuel conservation, and to assure the most efficient use of buses. School administrators shall evaluate the safety of pupils at bus stops periodically and shall, at the request of the school board, report the results annually to the school board.

A written vehicular and pedestrian traffic control plan for each school shall be reviewed annually for safety hazards. All new school site plans shall include provisions that promote vehicular and pedestrian safety.
