

CCS HEALTH SCREENING TOOL

DOES YOUR CHILD HAVE ANY SYMPTOMS...

...OR RISK FACTORS?

IF THE ANSWER IS YES...

PLEASE KEEP YOUR CHILD HOME and check with your healthcare provider for guidance. If your child shows COVID symptoms or has possible or confirmed COVID, keep ALL unvaccinated siblings home.

If these symptoms are common for your child or have been treated by a healthcare provider, then please call your school nurse before you send your child to school.

If the student is fully vaccinated and symptom-free, they can attend school when close contacts either show symptoms or have suspected/confirmed COVID.

OTHER REASONS FOR KIDS TO STAY HOME:

- Red, itchy, draining eyes
- Other contagious disease, including pertussis, ringworm, impetigo, lice, or conjunctivitis.

TO RETURN TO SCHOOL:

The principal/nurse must receive written notice that the student has received adequate treatment.
